Approval Letter

Department of Information Technology is interested to organize 30 Hrs Training on Linux from 31 Jan to 17 Feb 2022 10:00 AM onwards for IT II Year students in association with IIST RedHat academy.

Kindly approve for organizing the training.

A green ink signature is written over the circular stamp.

DATE:24/01/2022

Notice

All Students and Faculty members are hereby informed that department of IT is organizing 30 Hrs training on Linux from 31 Jan to 17 Feb 2022 from 10:00 AM to 12:00 Noon for II Year students in association with IIST RedHat academy. All the students from II IT should take benefit of the same.

For more detail contact faculty coordinator Ms.Dipti Rege (IT Department) and student coordinator Mr. Puneet Kumar Dwivedi.

Expert : Ms. Megha Birthare

HoD IT

Principal

Objectives

The objectives of the Certification Course are:

- To teach principles of operating system including File handling utilities, Security by file permissions, Basic Linux commands, Scripts and filters.
- To familiarize fundamentals of the Bourne again shell (bash), shell programming, pipes, input and output redirection Control structures, arithmetic in shell interrupt processing, functions, debugging shell scripts.

Outcomes

On completion of this course, students would be able to:

- Ability to use various Linux commands that are used to manipulate system operations.
- Ability to write Shell Programming using Linux commands.

Course Content

1. Introduction to operating systems: OS functions, OS types, components (kernel, drivers, etc.); command-line interfaces (CLIs) vs. GUI interface (GUIs) {1 class}
2. Introduction to UNIX: Linux/UNIX history; CLI: shells, bash, C shell; distributions and application software; file system structure, pathnames, file permissions {4 classes}
3. Effective shell (CLI) usage: basic commands and utilities (cd, mkdir, rm, cp, cat, etc.); piping, redirection, filters (grep, sed etc.); command line editing, history, etc; shell startup files, aliases {6 classes}
4. Bash shell programming: variables, parameters; control constructs (if, for, while, etc.); I/O {4 classes}

Summary:

Department of IT has organized Training on Linux for II Year students. The training was from 31 Jan to 17 Feb 2022 from 10.00 AM 12:00 noon. 70 students participated in the training. Students had intense training for 30 Hour. The training commenced from 10.00 AM. HoD IT addressed students and welcomed them for the training. Dr. Sathish, HoD IT said that Linux, which is a free operating system and free from viruses, has been adapted by more computer hardware platforms than any other operating system. He said that Linux is the most preferred operating system for mobile phones, tablet computers, network routers and video games, and is used by 95% of the world's fastest supercomputers. For this reason, he said that especially IT students should have knowledge of Linux when they finish their graduation so that they get better opportunity in the job market. He then handed over the session to trainer, Ms. Megha Birthare. She started training with the salient features of LINUX, the Free and Open Source Software. There was an introductory highlight about operating system. Trainer then gave demonstration of Linux Desktop Environment. Later on there were practical and hands on session on various basic commands, file related commands, directory related commands, permissions, redirections and shell programming. Students were also made familiar with vi editor. Overall, this training provided great insight on Linux operating system to students and students found this training helpful. Total 70 students participated in the training.

Objectives

ML Course Objectives:

The course will be a guide to learning how to use the power of Python to analyze data, create beautiful visualizations, and use powerful machine learning algorithms!

This course is designed for both beginners with some programming experience or experienced developers looking to make the jump to Data Science!

RHCSA (RedHat Certified System Administrator) Course Objectives:

Main objectives of this course is to make students aware about how to:

1. Install Red Hat Linux interactively and with Kickstart
2. Control common system hardware; administer Linux printing subsystem
3. Create and maintain the Linux filesystem
4. Perform user and group administration
5. Integrate a workstation with an existing network
6. Configure a workstation as a client to NIS, DNS, and DHCP services

Outcomes

ML Course Outcome

On completion of this course, students would be able to:

- Use Python for Data Science and Machine Learning
- Implement Machine Learning Algorithms
- Learn to use NumPy for Numerical Data
- Learn to use Pandas for Data Analysis
- Learn to use Matplotlib for Python Plotting
- Learn to use Seaborn for statistical plots

RHCSA (RedHat Certified System Administrator) Outcomes:

Upon successful completion of this course, students will possess basic Linux system administrator knowledge and will have actual ability to install, configure, and attach a new Red Hat Linux system to an existing production network.

Summary:

Department of Computer Science and Engineering, at Indore Institute of Science and Technology, Indore has conducted Internship on “**Machine Learning using Python and RHCSA**” in association with “**RedHat Academy**” under **On-Campus Internship Programme (OCI)**. The Internship Session has been inaugurated by Shri Arun S. Bhatnagar, Director General IIST and Dr. V R Raghuvver, Principal IIST. Ms. Sonali Tidke, HOD, CSE Dept briefed about the Internships going to be conducted under OCI in the Inauguration Ceremony. This internship has been held from 17th June 2019 till 6th July 2019.

Mr. N Siba and Mr. Vijay were the Resource Persons who provided Internship. Each Internship Session has been conducted for Three Hours from 9:15AM to 12:15PM followed by a Practice Session of Three Hours from 1:00PM till 4:00PM. Students practiced daily tasks at evening from 6:00 PM to 8:00 PM and follow-up for the same was taken by instructor on daily basis. Under this internship, students of Computer Science and Engineering Department has been taught MTA Certification course for Python. The topics Discussed are:

Machine using Python:

- How to program in Python.
- Implementing Data types, statement, operators and strings etc.
- Implementing OOPs in Python.
- Create GUI Applications using Python.
- Connecting with databases.
- Implementing TCP Socket connectivity.
- Programming with Python
- NumPy with Python
- Using pandas Data Frames to solve complex tasks
- Use pandas to handle Excel Files
- Web scraping with python
- Use matplotlib and seaborn for data visualizations
- Machine Learning with SciKit Learn, including:
 - Linear Regression
 - Logistic Regression

RHCSA course content:

- Access the command line
- Manage files from the command line
- Get help in Red Hat Enterprise Linux
- Create, view, and edit text files
- Manage local Linux users and groups
- Control access to files with Linux file system permissions
- Monitor and manage Linux processes
- Control services and daemons
- Configure and secure OpenSSH service

- Analyze and store logs
- Manage Red Hat Enterprise Linux networking
- Archive and copy files between systems
- Install and update software packages
- Access Linux file systems
- Use virtualized systems
- Comprehensive review

Students had intense internship for 160 Hours in total on these topics.

N SIBA KUMAR REDDY

Technical Consultant

PROFILE

A self-motivated, experienced and resourceful professional with over 2+ years of experience as Linux Administrator, Technical Support, DevOps Engineer and Implementing Infrastructure Automation across various platforms, Deployment of Private Cloud, web application automation using DevOps tools, setting up the Infrastructure on AWS cloud and support

EDUCATION

Bachelor of Science in Information Technology , Khemundi College 2016 (Berhampur University)

TRAINING

- Knowledge in Ansible
- Knowledge in Linux Installation
- OpenShift Administration.

TECHNICAL SKILLS

- **OS Knowledge:** Win7, WIN10, Linux
- **Automation Tool:** Ansible
- **Core Skills:** Infrastructure Automation and Management
- **Cloud Used:** Openshift
- **Scripting:** Shell Scripting, YAML
- **DevOps Tools:** Ansible Tower
- **Virtualization Technology:** RHVM
- **Containerization Tool:** Docker

WORK EXPERIENCE

Technical Consultant | Bangalore

Prodevans Technologies LLP | Jan, 2019 - Present

Openshift Administrator

- Deploy and configure an Openshift Enterprise 3.9/3.11 multi-node cluster environment.
- Upgrade Openshift Cluster both minor and major upgrades.
- Creating Master, Infrastructure and Workers Nodes.

- Setting up Quotas and Limits Ranges .
- Attaching and detaching PV and PVC
- Build and deploy containerised images and install , configure and manage an openshift environment .
- Well versed with monitoring and alerting tools on OpenShift platform like Prometheus, Grafana
- Scaling of PODS.
- Setup best practices for Openshift .

Technical Consultant | Bangalore
Complete Open Source Solutions (COSS) | May 2017 – Dec 2018

E-Clinic

- Linux Administrator
- Maintain and develop all Linux infrastructure
- Manage, coordinate, and implement software upgrades, patches, hot fixes on servers, workstations, and network hardware .
- Collaborate with other teams and team members to develop automation strategies and deployment processes .
- Familiarity with load balancing .

TECHNOLOGIES/DOMAIN EXPERIENCE

- Linux Administration
- DevOps CICD
- Private and Public Cloud
- Experience in Business Support Solutions

LANGUAGE SKILLS

- English
- Hindi
- Odia

Prodevans Technologies LLP
