CHAPTER – 10
EVALUATION OF INTERNSHIP

Evaluation Methodology

A sample sheet for overall evaluation of Internship has been designed. Sample excel sheet can be downloaded (for both degree as well as diploma program) from AICTE Internship Portal. **Evaluators just need to enter the fields highlighted in Blue Color.**

Faculty mentor / TPO will enter following details in the sheet (**Fields marked in blue**). E.g.

STUDENT NAME			DHARMESH KUMAR DEWANGAN	
ROLL NO/INSTITUTE ID			1401ME12	
PROGRAM NAME			B.E. In Mechanical Engineering	
INSTITUTE NAME			BHILAI INSTITUTE OF TECHNOLOGY DURG	
PROGRAM TYPE (DEGREE/DIPLOMA)			DEGREE	
Total Internship Credits for the Degree Program			**16**	**Credits**
For 1 Credit			**45**	**Hours of work is required**
For	**16**	**Credit**	**720**	**Hours of work is required (Minimum)**

Note that 1 Credit corresponds to 45 hours of work. Thus, say 16 credits as in above e.g. will require a minimum of 16 x 45 = 720 hours of work to be considered for evaluation. Hours of work beyond minimum requirement may be considered for evaluation as it may help student to improve his/her net score.

In "Evaluation Sheet for Degree Courses", Work done under respective sub-activity will be evaluated by the mentioned evaluator/In-charge. **Every Sub-Activity In-charge, will send two details to the Faculty Mentor of the student, for the sub-activity student performed under his/her guidance i.e.**

i. **Total Duration (In Hours)**: For a particular sub activity, how many hours that student devoted. For e.g. in below mentioned evaluation sheet, For Sub activity "Inter/Intra Institutional Workshop/Training", student devoted 51 hours.

ii. **Marks Obtained (Out of 10)**: For a particular sub activity, how much marks do the evaluator/In-charge of the sub-activity gives to that student. E.g. for "Inter/Intra Institutional Workshop/Training", Programme Head has given 5 marks out of 10 to the student for his/her work.

Important Note: It is not mandatory to perform each and every sub-activity. However, it is mandatory to complete minimum no. of hours of work corresponding to the credits assigned to the Internship Program as per curriculum.

Internship on Rain Water Harvesting

(16th- 21st August 2021)

Programme Objectives

This SIG is intended to develop the following skills in the students which is mandatory for a good construction Engineer working on any Construction Projects. To understand the impact of the civil engineering solutions in society broadly in environmental contexts, and demonstrate awareness of contemporary issues and needs for sustainable development.

Objectives of Internship

Rain Water harvesting is essential nowadays as knowing extremity of water crises. Using ground water recharging can be overcome this problem. After this SIG, students can able to design and planning of a rain water harvesting system as a individual consultant and also able to work as a consultant for some organizations like PWD, PHED and other private firms which provides the consultancy services for rain water harvesting.

Internship Content

S.No.	Topic
1	India's rich tradition of Rain Water harvesting and current paradigms
2	Understand the basics of the ground water hydrology
3	Planning of rain water harvesting system
4	Designing and construction process of water harvesting system
5	Maintenance and monitoring mechanisms; components like filters, costing, water quality issues, treatment, etc.
6	Different techniques of rain water harvesting system
7	Models of rain water harvesting from residential and institutional buildings
8	Models of rain water harvesting from colonies, industries, public places, etc
9	Water policy and legislation

Learning Outcomes

1. Expertise to Water harvesting techniques
2. Understand policy framework for rain water harvesting, water conservation and water bodies.
3. Design, review and evaluate the merits of rainwater harvesting system
4. Act as trainers and organizers at household and community levels for efficient Water management in terms of water conservation.

(25th July – 01st Aug, 2022)

Programme Objectives

This SIG is intended to develop the following skills in the students which is mandatory for a good construction Engineer working on any Construction Projects. To provide the exposure to graduates on emerging issues and problem solving approaches, in order to meet the changing needs of the society, and the Indian industry in areas related to civil engineering design, planning and construction.

Objectives of Internship

To design residential building as per IS guideline. To prepare learners for their successful career in various domains of Civil Engineering profession by providing a strong foundation in analysis and civil engineering fundamentals necessary to solve practical problem.

Internship Content

S.No.	Topic
1	Analysis of beams and columns (STAAD PRO)
2	Analysis of Portal Frame (STAAD PRO)
3	Analysis and design of residential structure (STAAD PRO)

Learning Outcomes

The students will be able to:

1. Evaluate stresses in beams and columns.
2. Define materials and size for beams and columns.

ABOUT THE INTERNSHIP

The objective of this internship is to impart the basic knowledge of the techniques and instruments used in Contouring. It develops the knowledge of the students about the basic surveying instruments and methods of surveying. This training program helps for conducting reconnaissance survey and investigating geotechnical features of soil through exploration of civil engineering projects.

The internship covered the find the level of any point on the ground with the help of auto level and indirect contouring method to determine the levels of a catchment area for rain water harvesting.

OUTCOMES OF THE INTERNSHIP

1. The student shall be able to understand the concept of contouring.
2. The student shall be able to understand the concept of Leveling and apply it to find elevations of different points in the field by indirect contouring.

Programme Objectives

This SIG is intended to develop the following skills in the students which is mandatory for a good construction Engineer working on any Construction Projects. To understand the impact of the civil engineering solutions in society broadly in environmental contexts, and demonstrate awareness of contemporary issues and needs for sustainable development.

Objectives of Internship

Rain Water harvesting is essential nowadays as knowing extremity of water crises. Using ground water recharging can be overcome this problem. After this SIG, students can able to determining a rain water harvesting area/ catchment and also able to work as a surveyor for some organizations like PWD, PHED and other private firms which provides the consultancy services for rain water harvesting and others.

Internship Content

S.No.	Topic
1	India's rich tradition of Rain Water harvesting and current paradigms and Understand the basics of the ground water hydrology.
2	Planning of rain water harvesting system
3	Measurement by Auto Level
4	Calculation by using Rise and Fall method.
5	Calculation by using Height of Instrument method.
6	To Draw the catchment area using taken observations on drawing sheet and by using AutoCAD.

Programme Objectives

This internship is designed to provide a platform for interaction of architectural drawing and structural design software to the students. This internship provides a good opportunity to learn software and to exchange the ideas on problems occurs during any real time project of Health Center.

Objectives of Hands-on training

The designing of the healthcare center anywhere is a complex process. The civil engineer must extend his scope of services to do conceptual planning and schematic layouts for healthcare center project.

Our students must be expertise to design and produce construction drawings, structural plans and documents for the health care project by themselves so they must have great creativity and vision to ensure the project looks easily accessible, feasible to patients, doctors, and staff. It should meet all the medical demands like casualty, medical departments, pathology, pharmacy, doctor's chamber etc. They are also responsible for taking care of many parts of the project, so they must be very organized to keep track of all aspects of building drawings and structural design plans. Civil engineers with extensive experience can advance into higher-level supervisory roles as planning managers.

The students of IV year of Civil Engineering Department will have to participate actively in this Internship. The event will be held at Civil Department from 9.30 AM – 3.00 PM. The coordinator for the above event is Shanu Sharma, Assistant Professor, Civil Engineering Department.

So, I invite all the students of Civil Engineering to participate in the Internship and get advantages.

Objective and Outcome of Activity:

DEPARTMENT OF CIVIL ENGINEERING

Name of SIG – "Scratch to Execution Phase-2: Architectural Drawing and Structural Design of Health Center"

Semester (Year) Planned- VIII Semester (4th Year)

Duration of Course-45 Hrs

Dates Planned: 02/01/2023 – 07/01/2023

Trainers : Mr. Shashank Agrawal

Programme Objectives

This internship is designed to provide a platform for interaction of architectural drawing and structural design software to the students. This internship provides a good opportunity to learn software and to exchange the ideas on problems occurs during any real time project of Health Center.

Objectives of Hands-on training

The designing of the healthcare center anywhere is a complex process. The civil engineer must extend his scope of services to do conceptual planning and schematic layouts for healthcare center project.

Our students must be expertise to design and produce construction drawings, structural plans and documents for the health care project by themselves so they must have great creativity and vision to ensure the project looks easily accessible, feasible to patients, doctors, and staff. It should meet all the medical demands like casualty, medical departments, pathology, pharmacy, doctor's chamber etc. They are also responsible for taking care of many parts of the project, so they must be very organized to keep track of all aspects of building drawings and structural design plans. Civil engineers with extensive experience can advance into higher-level supervisory roles as planning managers.

Introduction to process control and instrumentation

Outcome and Objective

AutoCAD P&ID

AutoCAD P&ID software enables plant designers and engineers to efficiently produce P&IDs, and then integrate them into a 3D plant design model. Built on the familiar AutoCAD software platform, these tools bring modern P&ID design to designers and engineers who model and document process plants. Generate and share isometrics, orthographic, and materials reports. It will give students to a solid understanding of AutoCAD P&ID features and capabilities from the basics through to advanced components.

Objective

The successful conversion of a conceptual idea into actual execution of process industry is the basic aim of any process engineer. A project passes through various phases, viz., basic engineering, detailed engineering equipment fabrication /procurement, civil/structural work, erection and commissioning. Process and instrumentation diagram and design of plant 3D model are one of the most critical parts of that process. It truly represent the process plant, since detailed engineering work for any process plant depends more on the P &ID and 3D layout. Its correctness and completeness is very much essential. Any wrong information provided in the P&ID at the initial stage may to a big disaster or may entail heavy expenses later. Hence, great attention is required for the preparation of correct P&ID.

We Chemical Engineering Dept. of Indore Institute of Science and Technology are pleased to conduct this Internship under the SIG named **Process & Instrumentation Design** to give an exposure of latest technologies used in plant designing to our 2nd year students.

Outcomes

- Students will be able to understand P&ID Symbology, work on P&ID PIP workspace and tools to create P&ID drawings.
- Students will be understood that what's Schematic diagram and how to use AutoCAD P&ID to draw it.
- Students will be able to understand isometrics, orthographics, and materials reports.
- Students will be able to read and draft P&ID of any process plant.

- Students will be able to understand the Safety and regulatory requirements and Basic start up and operational information through P&ID.

Event Summary

Department of Chemical Engineering has successfully conducted an internship for second year students (2021-25) batch on the topic **Introduction to Process Control and Instrumentation.** The expert was Ms. Farhin Khan Assistant Professor in Chemical Engineering Dept. and the overall coordinator was Mr. Rahul Gupta Head I/C of the Dept. The students learnt how to draft process & instrumentation diagram on AutoCAD P&ID software and P&ID standards.

The evaluation criteria were on the basis of 50% weightage of test marks, 25% weightage of attendance and 25% weightage of overall performance during the internship.In the evaluation process Ms. Ganga Prajapat (1st position) and Ms. Nainsi Bhargava & Mr. Sudhanshu Singh Chouhan (2nd position) emerged as winners. They are awarded with cash prizes and certificates and all participants received certificates.

Introduction to Unit Operations of Chemical Engineering and Real World Applications

We Chemical Engineering Dept. of Indore Institute of Science and Technology are pleased to conduct this training program under the SIG named **Process & Instrumentation Design** to give an exposure of latest technologies used in chemical industries to our 2nd year students.

Objective

- The objective of the training program is to engage students into high level creative and critical thinking skills with an emphasis on the various modern technologies used in chemical process industries.
- To study basics of the core subjects of the chemical engineering.

Outcomes

- Students will be able to understand the role of chemical engineers in process industries.
- Students will be able to mechanical unit operations & their applications.
- Students will be able to mechanical unit operations & their applications.
- Students will be able to Industrial chemical separation techniques.
- Students will be able to Chemical reaction kinetics and reactor designing.
- Students will be able to Chemical process modeling & simulation.

Event Summary

Department of Chemical Engineering has successfully conducted an internship for second year students (2021-25) batch on the topic Unit Operation and Process Calculations on Real/Live Industrial Projects. The expert was Ms. Farhin Khan, Mr. Rahul Gupta, Dr. Samatha Singh, Mr. Rahul Bhargava and Mr.PankajMalviya on individual day and the overall coordinator was Dr. Samatha Singh Head of the Dept. The students learnt engineering design calculations, Chemical reaction kinetics, separation techniques, and basics of process modelling and simulation, drafting of PFD on AutoCAD software. Only the students who have 75% attendance got the certificates.

NOTE SHEET

We are pleased to inform you that we are organizing Internship on **"Industrial Analytical Chemical Instruments"** during 22nd August 2022 to 26th August 2022. In this we are planning to provide knowledge of Industrial analytical tools and SOPs that are essential for Quality assurance and Quality control testing and analysis. So we are requesting you to give the permission to use marketing team for offering certificate based on a small competition in this regard.

Outcome and Objective

Industrial Analytical Instrumentation

Analytical Industrial testing is a very important component of quality testing and validation of chemical and pharmaceutical products. In a laboratory, a lot of work is being done on analytical equipments. Thus workforce trained in handling such equipments is always in demand. Therefore, IIST offers an opportunity to act as a trained technician handling such equipments.

Objective

The course includes lectures and experimental work. Contents are introduction to spectroscopy, safety usage requirements, sample preparation for testing, calibration of device for different references and data processing of the results. The need for the course, learning objectives of the course, the explanation of the course contents and used tools for experiments in chemical Industry is depicted. Finally, the responses and evaluations of the industrial chemical engineers are to be taken. The goal of this internship is to help industry workers to study the fundamentals of industrial analytical instruments especially spectroscopy, to use modern spectrophotometer instrumentation safely and correctly and to obtain accurate results.

Our aim is to help you develop the knowledge and competence to operate your instrument efficiently and to optimize results. It will also help in understanding the fundamentals of an analytical technique, become "fluent" with newly acquired instrument, learn maintenance, or optimize an application or a process

Outcomes

A comprehensive study material for developing SOPs will be offered to meet the needs of the students. The accompanying material is appropriately aligned with the current Industry's expectations.

- Interactive sessions on all key areas of the Internship giving all flexibility to the students.
- Assessment and evaluation for all the internship modules in order to enhance the levels of competencies and skills of the participants leading towards the objective of application in the job.
- Students will learn customizable analytical requirements and field of application of the industrial instruments
- Students will have hands-on training designed for newcomers in industrial laboratory, also suitable for "false beginners" that would need to consolidate their knowledge.

- Student will also learn module for operators with a good knowledge of the instrument control, wishing to improve their analytical skills.

Process Integration with Pinch Technology

From [redacted] 2/1/23

ABOUT THE TRAINING PROGRAME

As process engineering calculation is very critical step for any chemical industry either it is Operating Plant or any Engineering Procurement and Construction company. CHEMCAD is widely used tool for process design and simulation, energy and material balance calculation, etc. Most of the process engineers used CHEMCAD for modelling and simulation purpose. Students should have expertise on various processes engineering simulatorslike CHEMCAD, DWSIM, ASPEN Plus etc. Accurate and precise calculations increase process economy and give better efficiency.

The training on **"Process Plant Modeling and Simulation using CHEMCAD"** will give exposure of CHEMCAD software to 3rd yr students under the SIG named **Process Integration with Pinch Technology**. It will give expertise on process simulators used in Chemical industries which covers wide spectrum of industries like Oil & Gas Production, Chemical, Nuclear Fuel Processing, Petroleum Refining, Gas Supply, Electricity Generation, Steel, Water & Sewerage, Food & Dairy Industry. The training focuses on more practical industrial problems based on Heat Transfer, Fluid Mechanics, Chemical Engineering Thermodynamics, Mass Transfer and Chemical Reaction Engineering.

ABOUT THE INSTITUTE

Indore Institute of Science and Technology, Indore (IIST), Indore Institute of Science &Technology (IIST) established in the year 2003, is amongst the Top 5 Engineering Colleges of Indore. The Institute is approved by AICTE, New Delhi and affiliated to RGPV Bhopal offering Bachelor's and Master's Degree in Engineering. At IIST, we are committed to enhance the employability Quotient of the Students along with Holistic Development. The Institute has tie–up with premier IITs (Delhi & Bombay) for Academic Excellence in the areas of Virtual Labs, e-Yantra, etc. We have well-qualified faculty team, mostly with Ph.D degree in the latest technological domains. Our Technology enabled Flipped Classroom pedagogy enhances the student engagement in the classroom and make them focused on the practical aspects of the subject. The institute has created, dedicated Special Interest Groups (SIGs) to enable the faculty and staff to work on the latest technologies in the newly established State of the art Lab Infrastructure for Internet of Things (IoT), Apple iOS application development, Cloud Computing, Data Analytics, Artificial Intelligence, Robotics, Aero Modelling, Waste Water Treatment, Water Harvesting, etc.

Learning objectives of Training Programme

- To provide expertise on Process Simulators.
- To familiarize the real chemical engineering problems faced in chemical industries and how to solve them on CHEMCAD software.
- To analyze the real industrial projects.

Outcomes of Training Programme:

- Identify and solution of real industrial problems in refineries and other chemical process plants.
- Performing material and energy balanceson process simulator i.e. CHEMCAD.
- Understand the application of Equation of States EOS.
- Performing batch and continuous reactor sizing and the difference between them.
- Applying pinch calculations to reduce and save energy cost in operation.

Event Summary

Department of Chemical Engineering has successfully conducted an internship for third year students (2020-24) batch on the topic **Process Plant Modeling and Simulation Using CHEMCAD**. The expert was Ms. Farhin Khan Assistant Professor in Chemical Engineering Dept. and the overall coordinator was Dr. Samatha Singh Head of the Dept. The students learnt engineering design calculations, solved industrial problems through CHEMCAD software and also engaged them in modelling of real chemical industries. The evaluation criteria were on the basis of 50% weightage of test marks, 25% weightage of attendance and 25% weightage of overall performance during the internship.In the evaluation process Mr.GautamChatterjee(1st position) and Mr.ShivamBhatnagar (2nd position) emerged as winners. They are awarded with cash prizes and certificates and all participants received certificates.

Event Summary

Department of Mechanical Engineering has organised a 5 day Internship on Advanced Excel for the third and Final year students of Mechanical Engineering.
The Resource Person was Mr. Dilip Sahu from Robotronix Indore.
During the 5 days the students were taught various topics starting from Basics of Excel and ending at Advance Excel.
Following topics were covered during the internship:

EXCEL BASICS

- Excel Introduction
- Customizing the Excel
- Using Basic Functions
- Formatting & Proofing
- Mathematical Functions
- Protecting Excel Paste Functions
- Date & Time
- Advanced Paste Special Function
- Sorting & Filtering
- Printing Workbook

ADVANCED EXCEL

- What If Analysis
- Logical Functions
- Data Validation
- Lookup Functions
- Pivot Table
- Chart & Slicer
- Excel Dashboard

After each session there were Query solving sessions in which all the queries were solved by Mr. Dilip Sahu.The students learned Excel in a very easy and understandable manner. last day the vote of thanks was given by Faculty Coordinator.

Objective and Outcome of the SIG

COURSE OBJECTIVES

Course Objective 1	To understand fundamentals of computer hardware and software, how computers work and how they process data and information has become indispensible for Computer Science students.
Course Objective 2	To stress the strengths of C, which provide students with the means of writing efficient, maintainable and portable code.
Course Objective 3	To learn and acquire art of computer programming and know about some popular programming languages and how to choose Programming language for solving a problem.
Course Objective 4	To design and implement a computer system including processor, memory and I/O system compiler, operating system and local area network interface
Course Objective 5	To lead a small team of student engineers performing a laboratory exercise or design project; to participate in various roles in a team and understand how they contribute to accomplishing the task at hand

COURSE OUTCOMES

CO Number	Course Outcome
CO1	Study about DOS, linux and Learn about the basic concepts of MS windows, My-Computer, window explorer, Control Panel. Students are familiar with Operating System its application and its file system
CO.2	Able to perform basic C/C++ programs, understand and implement the concepts like Class, Functions, Array, Inheritance, Constructor & Destructor , Operator overloading
CO3	Knowledge about the concept of data structure
CO4	Study about DOS, linux and Learn about the basic concepts of MS windows, My-Computer, window explorer, Control Panel. Students are familiar with Operating System its application and its file system
CO5	Able to perform basic C/C++ programs, understand and implement the concepts like Class, Functions, Array, Inheritance, Constructor & Destructor , Operator overloading

Objective and Outcome of the SIG

COURSE OBJECTIVES

Course Objective 1	To understand fundamentals of computer hardware and software, how computers work and how they process data and information has become indispensable for Computer Science students.
Course Objective 2	To stress the strengths of C, which provide students with the means of writing efficient, maintainable and portable code.
Course Objective 3	To learn and acquire the art of computer programming and know about some popular programming languages and how to choose Programming language for solving a problem.
Course Objective 4	To design and implement a computer system including processor, memory and I/O system compiler, operating system and local area network interface
Course Objective 5	To lead a small team of student engineers performing a laboratory exercise or design project; to participate in various roles in a team and understand how they contribute to accomplishing the task at hand

COURSE OUTCOMES

CO Number	Course Outcome
CO1	Study about DOS, linux and Learn about the basic concepts of MS windows, My-Computer, window explorer, Control Panel. Students are familiar with Operating System its application and its file system
CO.2	Able to perform basic C/C++ programs, understand and implement the concepts like Class, Functions, Array, Inheritance, Constructor & Destructor , Operator overloading
CO3	Knowledge about the concept of data structure
CO4	Study about DOS, linux and Learn about the basic concepts of MS windows, My-Computer, window explorer, Control Panel. Students are familiar with Operating System its application and its file system
CO5	Able to perform basic C/C++ programs, understand and implement the concepts like Class, Functions, Array, Inheritance, Constructor & Destructor , Operator overloading

NOTICE

This is to inform you that Department of Electronics & Communication is going to organize 40 Hours Internship cum Certificate Course Training on Real Time Embedded System and IoT application from 28th July to 5th Aug 2022. All the students of III Year will have to participate actively in this event so that you will get benefits from that event. The event will be held offline from 10:30PM to 04:20PM.

Faculty Coordinators:

a) Ms. Arpita Tiwari
b) Mr. Devendra Singh Mandloi
c) Dr. Mukesh Patidar
d) Mr. Pranav Paranjape

So, I invite all the interested Students to attend/participate in the workshop and get the advantages.

OFFLINE INTERNSHIP CUM TRAINING PROGRAM

Real Time Embedded System And IoT Application

FOR SESSION JULY-DEC 2022

Course Details

Course Name	Offline Internship Cum Training Program on Real Time Embedded System And IoT Application
Eligible Students for course	ECE-III Year -2022
Date	28th July, 2022 - 5th Aug,2022
Mode of Internship	**OFFLINE**
Arduino Software Download Link	https://www.arduino.cc/en/software
Hardware Required	Yes (As Per Internship/Trainning Course Module)
If applicable play store link	No
Pre-requisties	Basics Electronics , Basics of Circuit, C Programming, Basics Of Arduino And Microcontroller .
Setup Required	Offline SIG (Computer , White Board,Projector)
Assessment of Course	Quiz test will be conducted & Project Implementation
Certificate Criteria	Minimum 50 % Quiz test with 80 % attendance in all session.
Instructor /Trainer	Mr. Ravi Yadav

Course Objective

The objective is to engagae the students in Practical of AVR Microcontroller (Arduino Platform) ,Theroytically ,Practical Real Time Embedded System & Interfacing Aproch, Deep Details Study & Research on Internship Tittle and Understanding Indusrty need.

Course Outline

Basic Electronis, Embedded C Programming,Understaing Of Core Embedded System, Industrial Application of Embedded System,Avr Microcontroller,Pin Programming, Port Programming, Defferant Type of Periphiral Interfacing , Use of Arduino Software & Hardware , Project Development, Etc.

HandsOn Practice On Led, Switch,Sensor, Motor,Lcd, Seven Segment,Keypad,Relay,Serial Communication,Timer Etc.

Course Outcome

Students are able to express their creativity using Embedded C .

Students are able to understood Project Work Using Arduino Software & Hardware ,

Students are able to Troubleshoot about Embedded System Application's

Students are able to Sound technically fine in Embedded System on Arduino Platform & Project Work

Students are able to Deal With Project Development .

NOTICE

This is to inform you that Department of Electronics & Communication is Going to Organize 60 hours training on projects skill Development by IIST EC Department From 2nd January, 2023. All the students of final year will have to participate actively in this event so that you will get benefits from that event.

Faculty Coordinator

Mr. Devendra Singh Mandloi

So, I invite all the interested students to attend / participate the training and get the advantages.

OFFLINE INTERNSHIP PROGRAM ON

Art & Science Of Pcb Design & Development with Eagle

FOR SESSION JAN-JUNE 2023

Course Details	
Course Name	Offline Internship Program on Art & Science Of Pcb Design & Development with Eagle
Eligible Students for course	ECE, Batch 2021-24
Date	2nd -5th , Jan 2023
Mode of Internship	Offline
Software Names	Eagle Software For PCB Design Available in Google Classroom
	Proteus Software For Simulation Available in Google Classroom
Hardware Required	Yes (Provided By College for Practical Use Only)
If applicable play store link	No
Pre-requisties	Basics Electronics and Circuit Design(Optional)
Setup Required	Projector,White Board, Lab Equipments etc.
Assessment of Course	In the end Quiz test will be conducted & Project Circuit Design Submission (Softcopy)
Certificate Criteria	Minimum 50 % in end quiz test with 80 % attendance in all session.
Instructor /Trainer	Mr. Ravi Yadav

Course Objective
The objective is to engagae the students in Practical of Pcb Design ,Theroytically pcb Design Aproch ,Deep Details Study & Research on Project Tittle ,and Understanding Indusrty need.

Course Outline
Basic Electronis,Circuit Designing, Circuit Simultion, Power Supply ,Designing ,Single Side Pcb, Double Sided PCb , multilayer Pcb, Placing Online order ,Project Design & Development Skills
PCB Design & Development ,Soldring Technich, SMD, HL , SOIC, Concepts, Current Trends In Embedded Company , Requirements of Various kind of job Profiles

Course Outcome
Students Will be able to express their creativity using Pcb Design Theire technology.
Students Will be able to understood Project Work Software
Students Will be able to Troubleshoot & Analyse the pcb Layout Rules
Students Will be able to Sound technically fine
Students Will be able to Understand Gerber file and export gerber file for production
Students Will be able to create single and double sided PCB Designs
Students Will be able to Demonstrate project on Pcb Design Tools

Indore Institute of Science & Technology IQAC INDORE

Indore Institute of Science & Technology INDORE

NDORE INSTITUTE OF SCIENCE TECHNOLOGY, INDORE DEPARTMENT OF ELECTRONICS COMMUNICATION ENGINEERIN(

Students Will Be an awesome electronics designer in very low time!!!

Department of Electronics and Communication Engineering Successfully Complete Internship Cum Training on PCB Design from 2nd Jan 2023 to 5th Jan 2023. Total 39 students successfully participate in this event. Training provides hands on to students on Art & Science of PBC Design & Development by eagle software. Students can build knowledge of circuit design, layout design, PCB design and implementation. students can build a basic electronics circuits like regulated power supply, project on automatic streetlight controller, temperature-controlled DC fan & automatic irrigation systems etc. During this project students are familiar with Eagle software, introduction of proteus software and their simulation tool, basics of breadboard, DSO, Multimeter, Op-amp Ic, LM 324 pin diagram, Different types of Relay & Switches, Diode etc.

Eligible Students for course	ECE-III Year -2023
Date	9th Jan, 2023 To Onwards
Mode of Internship	**OFFLINE**
Arduino Software Download Link	https://www.arduino.cc/en/software
Hardware Required	Yes (As Per Internship/Trainning Course Module)
If applicable play store link	Yes
Pre-requisties	Basics Electronics , Basics of Circuit, C Programming, Basics Of Arduino And Microcontroller .
Setup Required	Offline SIG (Computer , White Board,Projector)
Assessment of Course	Quiz test will be conducted & Project Implementation
Certificate Criteria	Minimum 50 % Quiz test with 80 % attendance in all session.
Instructor /Trainer	Mr. Ravi Yadav

INDORE INSTITUTE OF SCIENCE & TECHNOLOGY
Approved by AICTE, New Delhi, Affiliated to RGPV, Bhopal, Recognized by UGC under Section 2(f)

Course Objective

The objective is to engagae the students in Practical of AVR Microcontroller (Arduino Platform) ,Theroytically ,Practical Real Time Embedded System & Interfacing Aproch, Deep Details Study & Research on Internship Tittle and Understanding Indusrty need.

Course Outline

Basic Electronis, Embedded C Programming,Understaing Of Core Embedded System, Industrial Application of Embedded System,Avr Microcontroller,Pin Programming, Port Programming, Defferant Type of Periphiral Interfacing , Use of Arduino Software & Hardware , Project Development, Etc.

HandsOn Practice On Led, Switch,Sensor, Motor,Lcd, Seven Segment,Keypad,Relay,Serial Communication,Timer,IoT, Cloud, Etc.

Course Outcome

Students are able to express their creativity using Embedded C .

Students are able to understood Project Work Using Arduino Software & Hardware ,

Students are able to Troubleshoot about Embedded System & IoT Application's

Students are able to Sound technically fine in Embedded System ,IoT on Arduino Platform & Project Work

Students are able to Deal With Project Development .

Course Content

Date	Topic	Resource & Trainer Person
09/01/2023	Introduction of Embedded System , Real time Embedded System And IoT,Detail Study of Embedded System & IoT Application	Mr. Ravi Yadav
09/01/2023	Introduction of Microprocessor Unit (MPU), MCU for microcontroller unit ,Introduction to AVR & Arduino,Introduction to Arduino IDE,	Mr. Ravi Yadav

INDORE INSTITUTE OF SCIENCE & TECHNOLOGY

Approved by AICTE, New Delhi, Affiliated to RGPV, Bhopal, Recognized by UGC under Section 2(f)

INDORE INSTITUTE OF SCIENCE T CHNOLOGY, INDORE DEPARTMENT OF ELECT NICS COMMUNICATION ENGINEERING

10/01/2023	Introduction of IoT , Type of IoT , Intorduction of Different Cloud Application Software, Introduction of IoT Components	Mr. Ravi Yadav
10/01/2023	Introduction to ESP32 and NodeMCU ,GPIO (General Purpose Input Output), Program Counter, Stack Pointer,Linker,SPSR, CPSR,Port Programming,Pin Programming,,	Mr. Ravi Yadav
10/01/2023	MCU & MPU programming language, Introduction of MCU Programming language, Introduction Core Embedded C language. Importance of Embedded C language, Different Between Embedded C & Open Source Embedded C.	Mr. Ravi Yadav & Ms. Arpita Tiwari
11/01/2023	Introduction LED ,Type of LED, Working of LED,Application of Led,Industrial Use Of Led ,use Of Led in Consumer Electronics, future Scope of Led World, Interfacing of Led, Different Pattern of Led and Project	Mr. Ravi Yadav
11/01/2023	Introduction Switch, Type of Switch , Industrial Grad of Switches, Application of Switches, Interfacing of Switches,Counter System Switches,Switche & Led Interfacing , Multiple switch Interfacing. and Project	Mr. Ravi Yadav
11/01/2023	Introduction Keypad Matrix , Type of Keypad Matrix , Industrial Grad of Keypad Matrix , Application of Keypad Matrix , Interfacing of Keypad Matrix ,Password System and Project .	Mr. Ravi Yadav
12/01/2023	Introduction Sensor, Type of Sensor , Industrial Grad of Sensor, Application of Sensor,Interfacing of Sensor,Counter System Sensor, Sensor & Led Interfacing , Multiple Sensor Interfacing & Project	Mr. Ravi Yadav

12/01/2023	Introduction LCD, Type of LCD , Industrial Grad of LCD, Application of LCD,Interfacing of LCD,Text Display On LCD and Project	Mr. Ravi Yadav
13/01/2023	Introduction Motor & Motor Driver, Type of Motor & Motor Driver, Industrial Grad of Motor & Motor Driver, Application of Motor,Interfacing of Motor,Direction Control Of Motor , Motor , Switch,Sensor Interfacing and Project	Mr. Ravi Yadav
13/01/2023	Introduction of Relay & Relay Driver, Type of Relay & Relay Driver, Industrial Grad of Relay & Relay Driver, Industrial Application of Relay,Interfacing of Relay, Controlling of AC/DC Devices and Project	Mr. Ravi Yadav
14/01/2023	Introduction Seven Segment , Type of Seven Segment , Industrial Grad of Seven Segment , Industrial Application of Seven Segment,Interfacing of Seven Segment, Timer Using Seven Segment. and Project	Mr. Ravi Yadav
14/01/2023	Timer/ Counter,Serial communication (UART)/ Bluetooth HC-05and Project and evaluation test.	Mr. Ravi Yadav
15/01/2023	IoT Communication Protocols,Introduction to ESP32 and NodeMCU,Iot Clouds,Analytics & DatascienceSensors for IoT, Sending Data to Thingspeak -Arduino+Humidity+Air quality	Mr. Ravi Yadav
15/01/2023	Home automation using Google Assistant, Recording sensor data to google sheet using IFTTT with Arduino and sending alerts, Predictive Maintenance of a Duct Fan Using Nodemcu, ThingSpeak and MATLAB,	Mr. Ravi Yadav

Department of Electronics and Communication Engineering Successfully complete internship cum training on Real Time Embedded System & IoT Application from 9th Jan 2023 to 16th Jan 2023. 40 students are successfully participating in this program. This Training introduces students to the amazing world of IoT and its fascinating applications. Through this Internship program , students can build an IoT-based electronic device that can form the basis for smart buildings, smart irrigation systems, smart water monitoring, automatic street lighting systems, and home automation systems. They can also learn how to write programs, and relate the sensed data, and use Cloud computing basis concepts with Node-MCU.

Objective and Outcome of the SIG

COURSE OBJECTIVES

Course Objective 1	To understand fundamentals of computer hardware and software, how computers work and how they process data and information has become indispensable for Computer Science students.
Course Objective 2	To stress the strengths of C, which provide students with the means of writing efficient, maintainable and portable code.
Course Objective 3	To learn and acquire the art of computer programming and know about some popular programming languages and how to choose Programming language for solving a problem.
Course Objective 4	To design and implement a computer system including processor, memory and I/O system compiler, operating system and local area network interface
Course Objective 5	To lead a small team of student engineers performing a laboratory exercise or design project; to participate in various roles in a team and understand how they contribute to accomplishing the task at hand

COURSE OUTCOMES

CO Number	Course Outcome
CO1	Study about DOS, linux and Learn about the basic concepts of MS windows, My-Computer, window explorer, Control Panel. Students are familiar with Operating System its application and its file system
CO.2	Able to perform basic C/C++ programs, understand and implement the concepts like Class, Functions, Array, Inheritance, Constructor & Destructor , Operator overloading
CO3	Knowledge about the concept of data structure
CO4	Study about DOS, linux and Learn about the basic concepts of MS windows, My-Computer, window explorer, Control Panel. Students are familiar with Operating System its application and its file system
CO5	Able to perform basic C/C++ programs, understand and implement the concepts like Class, Functions, Array, Inheritance, Constructor & Destructor , Operator overloading
